Re: City of Papillion –Schram Road ROW 84th to 90th Street - Tree and Brush Removal

The City of Papillion is in the midst of the design phase of the construction project to pave Schram Road, 84th to 90th Street. The main grading and road construction is scheduled to begin sometime later this year if all right-of-way and easement can be acquired within a timely manner. The removal of the existing trees and brush is tentatively scheduled to start during the week of February 22 with completion by April 2, 2016. The work will be performed by Terry Hughes Tree Service of Gretna, Nebraska.

The northerly limits of the ROW have been marked with wood lath stakes. All of the existing trees and brush that have a trunk entirely within or partially within the Schram Road Right-of-Way (ROW) are to be removed. Any trees that are entirely outside of the Schram Road ROW will not be removed unless prior arrangements are made with the specific property owner. Trees with a trunk diameter of 10" or larger measured at ground level are to have all limbs cut off and tree trunk removed above a height of 10 feet above grade. This will allow for the tree roots to be more efficiently removed during the grading phase of the project.

The contractor will be allowed to fully close Schram Road from 84th to 90th Street from 9:00 a.m. to 4:00 p.m. to perform this work during the dates outlined above.

For further information on the contract documents please visit the City of Papillion's project webpage at http://www.papillion.org/schram_road.cfm. Please direct any questions about the tree and brush removal activities to Jeff Thompson, Papillion City Engineer at 402-898-9092 or email address jefft@papillion.org.

Respectfully Submitted,

Jeffrey L Thompson, P.E., CPESC, CFM
